Projects

Quiz Backend [Link]   **Oct 2024**
• This is a basic online quiz application built using Node.js, Express.js, and MongoDB.
• The application provides RESTful APIs for user authentication, managing quizzes, tracking quiz sessions, and viewing results.

ACONEWS [Link]   **Sep 2024**
• The project aimed to create a dynamic and user-friendly news platform providing real-time news updates and easy navigation across categories.
• The app was built using Node.js, Express, React, Redux, and the gnews.io API, with efficient routing, dynamic page generation, and state management.

Podcast Platform [Link]   **Oct 2023**
• The project aimed to create a robust platform for users to create, upload, and manage podcast episodes seamlessly.
• The app was built using React for the front-end and Firebase for backend services, focusing on user authentication, profile management, and podcast episode uploads.

Technical Skills

• **Programming Languages**: JavaScript
• **Backend Technologies**: Node.js, Express, Mongoose, REST APIs
• **Frontend Technologies**: HTML, CSS, React, Tailwind CSS, Redux
• **Version Control**: Git, Github
• **Cloud Services**: Firebase, Vercel
• **Tools:** Visual Studio Code
